THE WOLFE PACK GIVING YOUR PET THE BEST CHANCE OF A HAPPY AND HEALTHY LIFE

wolfevets.co.uk

The Wolfe Pack is our way of rewarding pet owners that want to give their pets the best protection against local diseases.

We use medicines that fit with the lifestyle of your pet, making sure that you are not over treating your pet, to give you the peace of mind they are receiving the best preventative care to keep them safe and well all year round.

We understand that some pets have a very sociable life, be that roaming the gardens, in the park or perhaps out with a dog walker while others spend more time in their own company.

You can rest assured you are doing the right thing in the most convenient way. We will help you make the right choices for your pets and then help you look after them using the rewards: 6 monthly well pet checks, 10% discount of all standard fees, free nurse consultations for routine maintenance.

EVEN WITHOUT THE	ON ALL OTHER FEES

Our ethos is based on promoting animal health and that is why we reward you for doing the essentials by making other parts of pet health care more accessible and convenient.

We recognise the importance of dog socialisation, whether that is in the park or with the excellent dog walkers many families make use of. Kennel cough is a risk to any dog who is mixing regularly with other dogs and that is why you receive this as part of the essential treatments on your plan at no extra cost. A decision made to specifically help dog owners in our neighbourhood.
